ANSWER KEY

Using Gas Efficiently

1. A cubic foot would hold about eight liquid gallons.
2. True. Natural gas is a nonrenewable resource.
3. The gas company knows how much to charge your family for gas each month because the natural gas that goes into your home is measured with a gas meter. The gas meter determines how many cubic feet of gas has been used.
4. Natural gas-using household appliances may include:
   - Furnaces
   - Pool and spa heaters
   - Clothes dryers
   - Outdoor lights
   - Fire pits or barbecues
   - Water heaters
   - Stoves/Ranges
   - Fireplace logs
   - Patio heater
5. Posters will vary.
6. Natural gas is a nonrenewable resource and limited in supply. By using energy wisely and conserving natural gas, we can make it last longer.
